SLAM Graduation Project Timeline

1 November - 30 November: Using the Kit and making the robot moves & Finishing the online SLAM course.

1 December - 15 December: Showing Sensors reading and make the robot interface with it & Deciding Kalman Filter.

16 December - 25 January: Final Exams.

26 January - 28 February: Choosing algorithm..

1 March - 31 March: Implementing the First Algorithm and finding its weak point.

1 April - 30 April: Replacing parts of the algorithm or using another algorithm if needed, and using different or more advanced sensor if necessary.

1 May - End: Making project Demo, Fixing bugs, Tiny Changes and Thesis.
